# FPM 231
# Applications in Project and Program Management

## Four-Day Instructor-Led Training          Classroom or Virtual

This course will allow you to develop the comprehension and application skills you need to construct an overall acquisition strategy approach in a simulated integrated project team (IPT) environment. The course emphasizes crafting an integrated approach to systems management, including developing requirements, technology and risk management, test and evaluation, and integrated logistics support. You will apply what you learn in team-based practical exercises.

Upon successful completion of this course, you will clearly understand how to fulfill mid-level program/project management obligations. Learning objectives for this course are aligned to the mid-level Federal Acquisition Certification for Program and Project Managers (FAC-P/PM) performance outcomes for requirements development and management processes, systems engineering, test and evaluation, and life cycle logistics.

## You will learn how to:

- ☑ Participate as a team member or lead an IPT toward achievement of project goals.
- ☑ Manage federal projects within a strategic decision environment that integrates the competing drivers of agency requirements development, programming and budgeting, and governance of the project life cycle ("Big A").
- ☑ Craft system requirements that fill agency capability gaps and analyze solution alternatives.
- ☑ Apply technical management processes that result in a balanced systems design.
- ☑ Comprehend the linkage between requirements development, systems engineering, test and evaluation, and product support.

## Learning Path

You must have already completed the FAC-P/PM level 1 training program. You are encouraged, but not required, to complete the FAC-P/PM level 2 training program in order.

FPM 231, Applications in Project and Program Management
FPM 232, Applications in Contracting
FPM 233, Applications in Business, Cost, and Financial Management
FPM 234, Applied Leadership in Project and Program Management

## Credits and Certification

This project management skills training offers you the opportunity to earn the following credits and certifications:

- ☑ FPM 231 satisfies the training requirements contained in the **Mid-Level Federal Acquisition Certification for Program and Project Managers (FAC-P/PM)** requirements development and management processes, systems engineering, test and evaluation, and life cycle logistics competency areas.

- ☑ Successful completion this course earns **32** continuous learning points (CLPs).

## General Schedule

This course spans four days and is presented in the classroom or virtually. Classroom offerings meet for eight hours per day, while virtual instructor-led training offerings meet for six and one-half hours per day, with offline assignments making up the remainder of the time.
